Bibliographische Daten

This prepared Chinese ink consists of two parts, one of which is an aromatic bright adhesive made by blending of eleven raw materials such as toluene, acetone, alcohol, etc. and another of which is gold and silver ink stick made up by five raw materials such as copper or aluminium powder, alcohol, etc.. The two parts are combined together during use. Its advantages are economical and practical, clean and sanitary, no pollution, and having aromatic odour. It is antioxidant, lustrous, non-precipitating, blended when using, and convenient for use.
